I've appeared on the Maxtor(Seagate) web site, but nothing about this problem and they have no software to download for that travel outside of back-up software and that's not really what I require.

It displays up as working properly in Gadget Manager, but it doesn't show up in My Computer and I simply cannot access it any even more! I've tried uninstalling it and then insert it back again in, but after the computer displaying a message balloon that my brand-new USB storage space device is definitely prepared for make use of, it simply can't end up being reached.. Please see Document ID: 201235 for details FreeAgent Go, Desk, and Xtreme Backup The most important part of any hard drive is the data that is stored on it for this reason it is very important to have this data on multiple storage devices or medias.

The screenshot shows the Mac External Hard Drive Data Recovery Pro application window. The title bar reads "Mac External Hard Drive Data Recovery Pro". The main content area features a central image of a black external hard drive with a USB symbol. To the right of the drive are three recovery mode options, each in a light blue box with a white border. The first option, "Deleted/Lost Recovery", is highlighted with an orange checkmark in the top right corner. Below these options is a large blue "Start" button.
