this is fun!

an on-the-rails shooter with gun and shield

still needs some fine tuning, but for 4\$ its well worth it id say! :). If you like MMO and Survival Crafting as much as I do then this is the game for you. Lots of fun, fighting monsters, making friends and build a town\Guild. With updates every few days\lots of fun and can't wait to see the improvements in the future. Worth getting this Pack just for the extra slots. What a great game...I love it!. Good game but too short. I have MASSIVE hopes for this..... I decided to not recommend this version of the game because of its additional contributions to the original. A.R.E.S. was already a decent sidescrolling platformer. This is simply an upgrade in graphics. minor adjustments to game mechanics, and the inclusion of more story (which is told through cutscenes). Besides those changes, the game is exactly the same as the original and does not merit the price that it was given at launch and still does not merit. I would only buy this game on sale, even if you do not own it..

NIFFELHEIM is RPG, survival action game, with crafting and building options !

You are brave warrior who has fallen in battle. But instead of finding well-deserved peace in Asgard, his soul is trapped in the harsh world of Niffelheim. Survive in this hostile world, ransack the neighboring lands, explore dangerous dungeons and find your way to Valhalla.

- I love co-op in the game -

excellent graphics

excellent gameplay and effects

excellent sound and music

excellent story

world with a lot of action

worth money and time

I highly recommend this game !. Love the aesthetic and the mechanics, fun times. this is my sh*t right here

i can finally be a non binary, violining bad a*s genius with a heart of gold :)

in all seriousness this is the best choice your own adventure ive played in a while, a definite recommend for fans of CyoA games.

10/10 would violin again. Great Music.

Though it could have came in an Album? Like if you put it in iTunes, it would already have an Album?

After completing the game, I can understand why people like it, but it was a nope for me. The idea was interesting, three form of water, replenishment from various source, was actually very creative.

However, the game added A LOT of extra difficulties due to its terrible hitboxes, physical movements, and visual effects. For instance, the spikes can kill you even with a little graze, the ice form is really uncontrollable, or the toxic drops killing you even thought its gone. That's why I can't like the game.

Trust me, it's going to be frustrating.. I bought this game at an event and played a round with it with the devs. IT WAS FUN!

sadly online multiplayer is not a thing yet, so you will need real friends to play with
who want to come to your house
who want to stay at your house

damn

also even the intro tells you to get a friend because the game is hard as ♥♥♥♥. Devilish, Pinball Quest, Breakout, RPG elements.... Well not really RPG but the story line... It's well written and gives you a giggle! The developer has a good sense of humor in the story while delivering a quality game where you guide the ball and hit certain items to progress in the game. It's such a good game that I think they should pursue a license to operate this game as a stand alone machine, possibly Bar Arcades? It would earn lots of quarters,

You can see the quality and love they put in here and you would appreciate its simplicity yet deep arcade like gameplay.. First of all the dynamic brake is waaay too weak. It barely slows the train down and I have to apply the normal brake to slow me down enough before I pass the next signal. I don't think the normal brakes should be used at 300 km/h.

It's shaking too much. Especially in the tunnel. It's ridiculous. The TGV should be a smooth ride.

No other traffic? It feels like I am the last man on earth.

There are a couple of bugs. For example; brakes won't properly release after an emergency braking and at some point the traction lever doesn't work anymore. You can see the amp meter jump back to 0 very quickly. Can be bypassed by using the cruisecontrol, which work sluggish. It's little things that will be fixed... I hope.

Of course there are also good things.

The sound is done very well. Maybe a bit too quiet though. The traction engines should be heard over the rail noise.

Cabin view looks nice. So does the pasenger view.

Complex signaling system with tutorial.

French routes in the future?

I was eagerly awaiting a TGV route but I am a bit disapointed. Especially for the \u20ac30,- I paid. Route's too short and there's isn't much going on. And on top of that the train drives not so well with the shaking and bad brakes. Perhaps a patch someday?. Insanely addictive top-down space shooter which reminds me of Armada for the Dreamcast. I'm completely taken with this simple yet fun game. I love the leveling up mechanics, and though grinding meteors for minerals can get tiresome, the combat is challenging enough to make it worthwhile.
